"Better Built" Mantels

Catalog No. 37

SPECIAL SIZE MANTELS

WHEN you have a job in which the chimney breast projects from the wall into the room the above drawing illustrates how the objection can be very effectively overcome. You can use a larger size design by returning the sides of the Mantel around the breast to the wall. Any of the Mantels shown in this catalog can be built in this manner.

To build such a special Mantel or to give you a quotation the first essential will be that the exact sizes of the width and depth of the chimney breast be given since the body and shelf of the Mantel are made to fit properly around the front and sides of the breast.

This illustration shows how our Georgian Colonial Mantel No. 878 will appear when built in this special manner with paneled returns.

We SPECIALIZE in building Mantels to individual specifications. Send us your drawings and get our quotations first.

BETTER BUILT ARTISTIC WOOD MANTELS

O

NE of the first essentials to be taken into consideration in making wood mantels is to have correct designs. Our Mantels are designed by one who makes a specialty of this kind of work.

Another very important requisite is that the lumber entering into the manufactured product be thoroughly kiln-dried. Thru long years of experience we have learned just how to kiln-dry our lumber so that it will be reduced to the proper moisture content before it is assembled in our Cabinet Department. This part of the work is not done on a hit and miss proposition but scientifically tested in kilns that are automatically controlled by a Moistat.

Any room that is adorned with a "Better Built" Colonial, Modern French, Italian Renaissance, or other Period Mantels creates a homey feeling and radiates a cheerful atmosphere to those within the room.

"A product with a good reputation removes every shred of hazard in the buyer's selection of it."

CRAFTSMANSHIP IN MANTELS

WE HAVE spoken of some of the essentials necessary to make attractive Mantels such as having the correct design and the material in the proper condition but this, however, is not all. After you have selected the correct design and have the material ready for assembling it is very important that the assembling be done by a master craftsman. Our Mantels are individually assembled under the supervision of a skilled cabinet maker of more than twenty years of successful experience in a well organized plant where quality is not sacrificed for production.

We take the position that we are qualified to carry out the well-designed plan of the designer and assemble the properly prepared material for the Mantel in such a way that every detail of the design is brought out to the best effect.
